Day 1 Task: Social Media Research

Open the Company Social Media Pages:

1. **LinkedIn**
2. **Instagram**
3. **Twitter**

Collect Basic Information:

Platform	Accounts	Followers	posts	Post Frequency	engagements
Linkedin	Amazon	36M	20k+	20/Week	High
Instagram	Amazon	6.2m	3,780	10/week	medium
Twitter	Amazon	5.9M	1000+	7–10	Low

Check the Type of Content

Content Type	Description
Internship Announcements	Posts about internship opportunities
Educational Posts	Tips, learning resources, AI or tech knowledge
Company Updates	Achievements, partnerships, events
Promotional Posts	Marketing or product promotions
Event Posts	Workshops, webinars, seminars

Instagram Content:

Visual:

- Bright colors and attractive designs
- High-quality product photography
- Clean modern graphics
- Short visual storytelling posts

Caption:

- **Short and engaging**
- Friendly and casual tone

- Include emojis and hashtags

Key Observation:

Instagram focuses on visual marketing and lifestyle appeal to attract younger audiences.

Twitter Content:

Content Type:

- Company announcements
- Customer interaction tweets
- Product promotions
- Technology updates

Tone content:

- Informal
- Conversational
- Quick and engaging

Key Observation:

Twitter is mainly used for real-time communication and audience interaction.

LinkedIn Content:

Content Type:

- Company achievements
- Innovation and technology
- Employee stories
- Leadership insights
- Sustainability initiatives

Tone:

Professional and informative

Visual Style:

- Corporate photos
- Infographics
- Short videos

Identify Initial Observations:

- Amazon maintains strong visual branding across social media platforms.
- Different platforms are used for different purposes (Instagram for marketing, Twitter for communication, LinkedIn for professional updates).
- Interactive content and hashtags are used to increase engagement.
- Consistent posting helps maintain audience interest.
